

Marc Goldsmith & Associates LLC

Services for the Legal Community

Marc Goldsmith & Associates LLC (MGALLC) has been supporting the energy bar for decades. First as Energy Research Group and later at Arthur D. Little and Stone & Webster Management Consultants, Marc Goldsmith has served as an expert consultant in commercial, federal and state regulatory proceedings throughout the U.S. since 1975.

Services currently offered vary by client need but can include:

- Strategic address of legal issues from an engineering perspective
- Training of client witnesses at the interface of technology and law
- Development of expert testimony models for other witnesses
- Development of technical cross-examination
- Expert witness services
- Technical review of witness testimony
- Training for legal staff on energy and engineering issues

Our experience in these areas includes:

- Developing the technical and financial case against a co-generator for overstating project development costs
- Developing the technical and financial case in defense of a lawsuit over the deletion of a preferential rate class
- Developing rate case strategies for rate recovery in prudence cases on large power plants
- Integrating rate case strategy with nuclear-safety requirements
- Training the prime witnesses (senior vice president and vice president) for a \$600 million cost recovery case
- Expert witness on a commercial \$1.3 billion case regarding spent nuclear fuel
- Expert witness on multiple hearings before both State and federal regulators on environmental externalities
- Expert witness on numerous nuclear safety disputes
